Chicago, Rock Island and Pacific Railroad Company

139 WEST VAN BUREN STREET | CHICAGO, ILLINOIS 60605

December 15, 1974

This new Station Book replaces several previous manuals. It updates and expands information found in many places. In publishing this Station Book, we aim to provide most of the Rock Island station designations presently used as well as the Standard Point Location Codes (SPLC) that may be used in years to come.

Two editions of the book are being published. One edition, permanently bound, contains only one numerical list of stations--the one in order of the car accounting station numbers or blocking codes. The other edition, published in a loose-leaf binder, contains two additional numerical lists of stations; one is in the order of the revenue accounting station numbers and the second is in the order of Standard Point Location Codes.

Both editions contain explanations of system blocking codes, an alphabetical list of stations, a table of interchange points and connecting railroads, a list of track scale locations, and a list of stations by main and branch with mileage.

Revised pages will be provided from time to time. These revised pages will contain necessary corrections to some section of the manual. For the loose-leaf binder edition, a cumulative update sheet will also be sent along with the revised pages. This cumulative sheet will show the page numbers which have been revised and the date of the last revision.

Some care has been invested into making this book as accurate as possible. Nevertheless, mistakes may be found. If you find any, please bring them to the attention of the Director of Revenue and Car Accounting, 745 S. LaSalle Street, Chicago, Illinois 60605.
