Emergency Hospital..... San Rafael

NOTE:—Emergency Surgeons should only be summoned for temporary treatment when prompt attention is required and when patients cannot be sent to or await arrival of District Surgeon.

SPECIAL INSTRUCTIONS

Employees whose duties are prescribed by Rules and Regulations of the Transportation Department, effective June 15, 1930, must each obtain a book containing these Rules and Regulations.

RULE 2. Designated Watch Inspectors:

S. A. Pope, Manager Time Service.....	65 Market Street, San Francisco
I. S. Preston.....	210 Phelan Bldg., San Francisco
C. F. Davidson, Traveling Watch Inspector.....	Sausalito
C. R. Ellis.....	San Rafael
W. F. Rohrer.....	San Rafael

A Standard Clock is located at Sausalito, Sausalito Shops and San Rafael.

RULE 4. Designated Holidays:

New Year's Day.
Washington's Birthday.
Decoration Day.
Independence Day.
Labor Day.
Thanksgiving Day.
Christmas Day.

When a holiday falls on Sunday, the following Monday is recognized as the holiday.

RULE 10 (J). Signs, oval in shape, govern maximum speeds of trains on curves requiring slower movement than speeds specified by time-table. The higher number is that for passenger trains, the lower for all other trains, and but one number is for all trains.

Sign is located one-half mile in advance of curve. Speed shown must not be exceeded from one-half mile beyond this sign to one-half mile before reaching sign

of same kind on opposite side of track. One set of signs may govern speed on one curve or two or more curves and intervening tangents.

Speeds indicated are the maximum speeds permitted. Slower speeds must be run when otherwise provided for and when conditions make a slower speed necessary.

RULE 14. Trackman's Call:

Four long, followed by four short blasts of whistle (— — — — o o o o) is Trackman's Call. This signal may be used when necessary to summon trackmen. It must not be used unnecessarily. Upon hearing this signal, by day or night, trackmen must immediately respond. Foremen must keep their men posted as to this signal.

RULE 19. Except in foggy weather, markers will not be displayed by Interurban trains by day.

RULE D-71. Trains may move between Sausalito and San Rafael, via Detour and via San Anselmo and between San Anselmo and Manor with the current of traffic irrespective of time-table superiority. Freight trains must avoid delaying passenger trains.

The movement of Interurban trains must be given preference over other trains.

RULE 72. Movement of trains over single track between Almonte and Mill Valley is governed by automatic block signals. Trains finding such signals at "proceed" may proceed, irrespective of time-table superiority. In case of heavy storms, fog, or other cause rendering view obscure, trains must proceed with caution.

TUNNEL No. 1, M. P. 11.9

Movement of trains on single track will be irrespective of time-table superiority and governed by automatic block signals as follows:

South End: Signal 116, normal position STOP. There is a preliminary beginning at signal 114.

North End: Signal 121, normal position STOP. There is a preliminary post 1000 feet north of signal 121.

Trains will approach these signals with caution.

Approaching signal, Conductor must observe position of signal and speed of train.

On passenger trains Conductor will station himself near forward end of train, on car platform. When signal is at PROCEED, Conductor will give engineman hand or lamp signal to proceed and engineman will not proceed without such signal. Conductor and engineman must observe whether signal changes from PROCEED to STOP as trains strike insulated joints at signal. Should engineer not be able to observe whether signal changes, he will require fireman to observe it and to notify him whether it changes. When signal so changes, Conductor will give engineman hand or lamp signal to proceed, and engineman will not proceed without such signal.

On freight trains, approaching signal, head brakeman must station himself in engine gangway on side on which signal is located; must observe position of signal and speed of train; must observe whether signal changes from PROCEED to STOP position as train strikes insulated joints at signal; and must advise engineer of such observation.

In case of STOP, having waited five minutes, should signal not change to PROCEED, or should it not change to STOP as train strikes insulated joints at signal and a train cannot be seen or heard within the limits of the block, train may proceed under protection of flagman.

Circuit breakers are located at north and south portal of tunnel. In case of accident or other emergency requiring shutting off of current in power rail in tunnel

section, circuit breakers can be operated by any one of eight push buttons located at lights placed at a lower elevation than other lights on east side of tunnel.

Pressing one of these buttons when lights are burning will open both circuit breakers.

When lights are not burning current can be shut off only by tripping breakers at both portals by hand.

To restore current, both circuit breakers must be closed by hand.

Northward trains must not exceed 15 miles per hour in passing over switches at either end of tunnel.

RULE S-72. Southward trains are superior to trains of the same class in the opposite direction.

RULE 83(A). Interurban Trains register at Sausalito.

RULE 93. Yard limits are established at the following stations: Sausalito includes Pine and Waldo, San Anselmo includes Bolinas Ave., Manor includes Fairfax, San Rafael includes B Street and California Park.

RULE D-97 (A). Will apply on double track between Sausalito and San Rafael via Detour and via San Anselmo and between San Anselmo and Manor and on single track between Almonte and Mill Valley.

RULE 103 (A). In general, highway crossing signals are so designed that they will not operate for trains or engines making a reverse movement after having passed over the crossing. Trains or engines making such reverse movements must protect the crossing unless it is known that signals are operating.

At San Anselmo, when wye or freight house switch on northward main track, Manor line, is thrown for siding, wigwag signal at Madrone Avenue, second crossing north of station, will not operate.

If an engine or train is moving northward on northward track, neither switch must be thrown for siding until such engine or train has passed Madrone Avenue.

RULE 221. Engineer in approaching a train-order office, after whistling for station, if train-order signal can be seen, will sound four short blasts of whistle (14-j) for "proceed" signal, and if "proceed" signal is given will acknowledge it by two short blasts of whistle (14-g).

RULE 509. Automatic block signals must not be depended upon to protect trains. When necessary, trains must be protected by flagman.

MANOR

Northward track between Signal B-186 and north switch is known as track No. 1.

Southward track between Signal B-186 and north switch is known as track No. 2.

First crossover south of Signal B-187 is known as crossover "A".

Second crossover south of Signal B-187 is known as crossover "B".

Signal B-186 located on northward track 2500 feet north of Signal B-182 governs northward train movements to Signal B-187 on track No. 1 or through crossover "A" to track No. 2.

Signal B-186 is normally at stop and will clear when train is on preliminary, if no train on either track No. 1 or 2 or crossover "A" or "B" between this signal and Signal B-187.

Signal B-187 located 400 feet south of Station on track No. 2, governs southward train movements on tracks 1 and 2 and through crossovers "A" and "B" to Signal B-186.

Trains must approach these signals with caution. If signal at stop, after stopping, train may proceed with caution.

Train movements on tracks 1 and 2, between Signal B-187 and north switch must be made with caution.

Normal position of switches, crossover "A":
South switch for crossover.

North switch for track No. 2.

Normal position of switches, crossover "B":
South switch for track No. 2.

North switch for track No. 1.

Trains must use track No. 2 for making station stop.

DETOUR

Train movements Tiburon line to northward main track are governed by automatic block signal (C-126), located 300 feet south of junction switch. Trains must approach signal with caution.

Southward trains desiring to use crossover must stop before reaching signal No. 143. When north switch is lined for crossover the upper arm of signal No. 143 should indicate STOP. When both switches are lined for crossover, lower arm of signal No. 143 should indicate PROCEED. If both switches are lined for crossover and lower arm of signal No. 143 does not indicate PROCEED, train must wait not less than 5 minutes and may then proceed under protection of flagman.

Normal position of junction switch is for northward main track.

OIL BUFFER SPRING SWITCHES

When making trailing point movement and train is stopped on switch a reverse movement must not be made, nor the slack taken until the switch has been thrown

by hand. When movement has been completed through switch, reverse movement must not be made until point closes.

Running switches are prohibited and sand, blow-off cocks and injectors must not be used while passing over these switches.

Switches are located as follows:
Mill Valley, Main track—Track No. 1.

Tunnel No. 1. End of double track at each end of tunnel.

Detour. Northward main track—Tiburon line.

Manor. North end crossover "A".

Light signal, indicating position of switch for facing point movement, is located in advance of switch. Signals are from 25 to 55 feet from switch.

INTERLOCKING

Movements governed by short arm or dwarf signals must be made with caution and position of switches observed, as such signals govern movements for various routes. Whistle signal: diverging route, one short, one long, one short (o—o—o).

When whistle on tower is sounded all engines and trains moving within district controlled by tower must stop and get proper signal from towerman before proceeding.

TOWER No. 1, SAUSALITO

Limits. South: indicated by signs on signals. North: northward main track, signal 56, 881 feet north of tower; southward main track, signal 47, 670 feet north of tower; Drill Track, signal 48, 670 feet north of tower; limits also indicated by signs on signals.

No operator } 12:15 A.M. to 5:50 A.M. daily except Sunday and holidays.
on duty: } 12:15 A.M. to 6:15 A.M. Sunday and holidays.

Switches will be lined track 9 to southward main track. Rule 663 will govern movements through interlocking.

When necessary, current can be cut off of power rails south of interlocking signals No. 47 and 48 (670 feet north of Tower 1) by notifying operator in tower or by operating either of two push buttons located on umbrella shed posts, (identified by black band painted thereon) on platform between tracks 5 and 6. When power has been cut off by the operator of either push button the operator in tower must be promptly notified.

Trains will leave in following order: San Rafael via Detour, Manor, San Rafael via San Anselmo, Mill Valley.

Engineers, after receiving proceed signal from conductor must not start train until interlocking signal governing movement is at PROCEED.

If train is unable to proceed, engineer will give one short, one long, one short and one long sound of the whistle thus: (o—o—o—o) to indicate to towerman that he cannot accept signal.

TOWER No. 2, ALMONTE

Continuous service.

TOWER No. 3, BALTIMORE PARK

No operator on duty: Midnight to 6:20 A.M. } Daily except Sunday
10:20 P.M. to Midnight } and holidays

Midnight to 7:20 A.M. }
9:20 A.M. to 5:25 P.M. } Sunday and holidays
9:45 P.M. to Midnight }

Switches will be lined and locked for Sausalito-San Anselmo route, and when signals for Sausalito-San Anselmo route are at stop, trains will be governed by Rule 663. No train movements can be made to or from Detour route when operator is not on duty.

Before going off duty operators will assure themselves that all overdue trains via Detour route have passed.

TOWER No. 4, SAN ANSELMO

No operator } 12:50 A.M. to 5:00 A.M. daily except Sunday and holidays.
on duty: } 12:50 A.M. to 5:45 A.M. Sunday and holidays.

Switches will be lined for San Anselmo-San Rafael route. Rule 663 will govern movements through interlocking.

Yellow signals on masts of interlocking signals govern southward movements from San Rafael and Manor routes when southward main track is occupied or obstructed within interlocking limits. On proceed indication of these signals movements may be made with caution.

TOWER No. 5, SAN RAFAEL

Continuous service.

Wigwag signals at the following street crossings are controlled and operated by towerman:

Irwin Street, at south end of freight house.

Toll Road, second crossing south of passenger depot.

Third Street, first crossing south of passenger depot.

No train or engine movements must be made upon or over any of these crossings when wigwag signals not in operation, except when movement is preceded by flagman.

Conductors must announce in waiting room departure of their trains at least one minute before leaving.

Push button on east side of Express Company's building or at south edge of ticket window will operate annunciator in Tower No. 5. Conductors of southward electric trains must press button not less than 15 seconds or more than 20 seconds prior to departure.

AIR BRAKE RULE 39. In making running air brake test trainmen use communicating signal instead of hand or lamp signals.

MISCELLANEOUS

Trains between Sausalito and San Rafael will operate via Detour unless otherwise specified.

When necessary to cut off or restore current in power rail notify Alto Substation. Alto Substation may be called on Company telephone or P. T. & T. telephone, Mill Valley 1.

Engines larger than 114 Class will not clear umbrella sheds on tracks 3, 4, 5 and 6, Sausalito.

Southward trains having connections with bus at Fairfax, will wait five minutes for such connections when necessary.

When trains are being delayed, for any reason, conductors must immediately notify dispatcher so that arrangements may be made for other trains to pick up passengers.

Electric trains with dead time at San Rafael must clear station while steam trains are making station stop, except when by so doing, departure of electric trains will be delayed.

LIMITS OF DOUBLE TRACK

Sausalito—M.P. 11.56, 686 feet south of South Portal Tunnel No. 1.

M.P. 12.11, North Portal Tunnel No. 1—San Rafael via Detour.

Baltimore Park-Manor.

San Anselmo-San Rafael.

LIMITS OF AUTOMATIC BLOCK SYSTEM

Sausalito-San Rafael via Detour

Almonte-Mill Valley

Baltimore Park-Manor

San Anselmo-San Rafael

SPEED RESTRICTIONS

Trains must not exceed the following maximum speeds (shown in miles per hour).

BETWEEN

Sausalito and San Rafael via Detour..... Passenger Freight
Almonte and Mill Valley..... 45 25
Baltimore Park and Manor..... 50 30
San Anselmo and San Rafael..... 50 30

except that maximum speeds shown below must not be exceeded.

Page	BETWEEN	Passenger	Frt.
2-3	Through Tunnel No. 1, M.P. 11.9.....	25	25
2-3	Corte Madera, road crossing north of station platforms*.....	20	20
3	Greenbrae, bridge and trestle approaches, M.P. 14.6.....	25	25
2-3	San Rafael, within city limits*.....	10	10
2-3	Baltimore Park, through switches to or from Detour.....	10	10
2-3	Larkspur, road crossing north of station platforms*.....	20	20
2-3	Kentfield, road crossing south of station platforms*.....	20	20
2-3	Ross, road crossing north of station platforms*.....	10	10
2-3	Bolinas Ave., Road Crossing south of station platforms*.....	10	10

*Maximum speeds fixed by city ordinance.

The speeds shown are maximum speeds allowed on straight track. Good judgment and care must be used on sharp curves and trains must be moved at lower speeds as may be necessary.

Through crossovers and turnouts: 10 miles per hour, except that northward trains must not exceed 15 miles per hour in passing over switches at either end of tunnel No. 1, M.P. 11.9.
